

Quentin RÜHL

Senior Infrastructure Engineer

Experienced IT Engineer with 6+ years in cloud and infrastructure security, successfully leading projects for companies ranging from 10 to 1000+ users.

Led the implementation of innovative security and infrastructure solutions in both cloud and on-premises environments.

Looking to leverage my technical expertise to transition into leadership roles, where I could drive business growth and technology innovation.

Experience

Senior Cloud & Security Engineer TLI Services for Dennemeyer Luxembourg / Since May 2022

- Lead the Cloud Team within the Infrastructure Department, driving cloud architecture, security, and migration initiatives across the organization.
- Architect the Azure environment's network and security foundation, supporting enterprise-level workload migrations and scalability.
- Delivered major security infrastructure upgrades, including migration to Prisma Access, 802.1x network access control for all users and office across 20+ countries.
- Advise cross-functional teams on infrastructure, cloud and security best practices, bridging technical operations with project goals.

Cloud Security & DevSecOps Consultant Thales Cyber Solutions (Excellium Services) Luxembourg / From October 2021 to May 2022

- Integrated Microsoft Sentinel into the company's Security Operations Center (SOC) offering, expanding Excellium's cloud-native security services and strengthening value to prospective clients.
- Participated in client-facing workshops and technical advisory sessions, aligning security strategies with client infrastructure goals.
- Provided cloud and security guidance to internal teams across consulting, SOC, and integration functions, promoting cloud adoption.

Senior Officer - IT Infrastructure & Solutions Deloitte Luxembourg Luxembourg / From October 2018 to October 2021

- Designed and maintained Deloitte Luxembourg's internal security infrastructure, including firewalls, VPNs, reverse proxies, and SIEM platforms.
- Led the implementation and rollout of Deloitte Luxembourg's Azure cloud environment, establishing network architecture and governance from the ground up.
- Took technical ownership of security infrastructure operations, ensuring availability, compliance, and performance across hundreds of systems.
- Collaborated with developers, architects, and business teams to align infrastructure design with operational and strategic goals.

CyberSecurity Engineer (Intern) SmartBuild Asia Singapore / From February 2018 to August 2018

- Designed and implemented a company-wide Information Security Management System (ISMS) in line with ISO 27001 standards.
- Hardened the company's AWS environment, SaaS application portfolio (GSuite, GitHub) and premises, implementing best practices, and network and security controls via Cisco Meraki and JumpCloud.
- Provided cybersecurity awareness training and technical guidance to staff, improving secure practices across teams.

Education
